

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

- 1.-2. (Canceled).
3. (Original) A dipole antenna comprising:
  - a first portion;
  - a second portion, the first and second portion defining a capacitive area;
  - a third portion, the third portion coupled to the first portion and to the second portion, the third portion defining an inductive area; and
  - a substrate, the substrate defined by a periphery and a void within the periphery, wherein the first portion, the second portion, and the third portion define a capacitively coupled dipole antenna, and wherein the capacitively coupled dipole antenna is coupled to the substrate such that the capacitative area spans the void.
4. (Original) The antenna of claim 3, wherein the third portion comprises a length having a first end and a second end, and wherein the length is longer than a straight line distance between the first end and the second end.
5. (Original) The antenna of claim 3, wherein one or more portion of the third portion is disposed relative to the first portion and the second portion in a non-parallel relationship.
6. (Original) The antenna of claim 3, wherein one or more portion of the third portion is disposed relative to the first portion and the second portion in a parallel relationship.
7. (Original) The antenna of claim 3, wherein the antenna comprises a high dissipation factor substrate, and wherein at least the first and second portion are coupled to the high dissipation factor substrate.
8. (Original) The antenna of claim 7, wherein the substrate comprises a FR4 substrate.

9. (Currently Amended) A system, comprising:  
a capacitively coupled dipole antenna, the antenna including a capacitive area; [[and]]  
a substrate, the substrate comprising a first void, wherein the antenna is coupled to the substrate, and wherein the capacitive area generally spans the void;  
wherein the system comprises a plurality of circuits, and  
wherein the substrate comprises a second void, wherein at least one of the plurality of circuits is disposed within the second void.
10. (Original) The system of claim 9, wherein the substrate comprises a high dissipation factor substrate.
11. (Original) The system of claim 9, wherein the substrate comprises a FR4 substrate.
12. (Canceled).
13. (Original) The system of claim 9, wherein the antenna is configured to operate at a frequency selected from the group consisting of: a GPS, a Bluetooth, a WiFi, a cellular phone frequency
14. (Canceled).
15. (Currently Amended) The system of ~~claim 14~~ claim 9, wherein the system comprises a wrist type apparatus.
16. (Original) The system of claim 9, wherein the system is selected from a group consisting of: a medallion, a button, a belt buckle, a wrist, a phone, a PDA apparatus.
17. (Original) The system of claim 9, wherein the system comprises a wrist type apparatus.
- 18.-25. (Canceled).
